### Trappola Marshland - Ombrone River Mouth

Designation date	13 October 2016
Site number	2284
Coordinates	42°40'14"N 11°01'03"E
Area	536,00 ha

## Color codes

Fields back-shaded in light blue relate to data and information required only for RIS updates.

Note that some fields concerning aspects of Part 3, the Ecological Character Description of the RIS (tinted in purple), are not expected to be completed as part of a standard RIS, but are included for completeness so as to provide the requested consistency between the RIS and the format of a 'full' Ecological Character Description, as adopted in Resolution X.15 (2008). If a Contracting Party does have information available that is relevant to these fields (for example from a national format Ecological Character Description) it may, if it wishes to, include information in these additional fields.

## 1 - Summary

### 1.1 - Summary description

*Please provide a short descriptive text summarising the key characteristics and internationally important aspects of the site.  
You may prefer to complete the four following sections before returning to draft this summary.*

#### Summary

*(This field is limited to 2500 characters)*

The site Trappola marshland - Ombrone River mouth (Padule della Trappola - Foce dell'Ombrone) represents one of the last remnants of a complex of wetlands (partly salty and partly freshwater) and sandy dunes, which constituted the pristine landscape of the Tyrrhenian coast. The landscape includes the mouth of the Ombrone river and coastal wetlands, which are bordered by the Tyrrhenian Sea. The site is a relict example of wetlands with a remarkable naturalistic value. The ground is flat, with a very close elevation to the sea level, varying according to the dunal-interdunal system, generating a mosaic of different habitats, including an alternation of permanently or seasonally areas flooded/wet. It is a semi-natural landscape modified by variations of the coastline and by anthropogenic reclaim operations, like water canalisation, pastoral use, reforestation and tillage. The site also includes a pinewood of anthropogenic origin and is characterised by a sporadic presence of free-ranging cattle (non-intensive).

This site has a very important ecological role, because of the presence of relevant and diverse habitats, including rare plant species and a number of animal species (especially birds) having many of them a conservational relevance from international/national/regional points of view. Moreover, the site is very important for maintaining the biological diversity of coastal wetlands in the Tyrrhenian coastal area, especially concerning birds: more than 150 species of which are listed as present or migrating to the area.

## 2.2 - Site location

### 2.2.1 - Defining the Site boundaries

#### a) GIS boundaries [link](#)

*Materials presented on this website, particularly maps and territorial information, are as-is and as-available based on available data and do not imply the expression of any opinion whatsoever on the part of the Secretariat of the Ramsar Convention concerning the legal status of any country, territory, city or area, or of its authorities, or concerning the delimitation of its frontiers or boundaries.*

#### b) Digital map/image

#### Former maps

<no file available>

#### Boundaries description (optional)

(This field is limited to 2500 characters)

The western border of the site includes sandy coast facing onto the Tyrrhenean Sea. Furthermore, the site is bordered by particularly extensive agricultural areas, by coastal pinewood and by mediterranean scrubwood.  
The Ramsar area is completely included within the Maremma Regional Park. It is included in the SIC/SIR/ZPS IT51A0039 "Padule della Trappola e Bocca d'Ombrone" (SIR 113 and ZPS A113), for its greater portion, in SIC/SIR IT51A0014 "Pineta Granducale dell'Uccellina" (SIR 114), in SIC/SIR IT51A0015 "Dune costiere del Parco dell'Uccellina" (SIR 115), as well as in SIR/ZPS 136 "Pianure del Parco della Maremma", to a lesser extent.

*Coordinates of the centre of the site, as automatically estimated from the GIS boundaries (for information only)*

### 2.2.2 - General location

a) In which large administrative region does the site lie?

b) What is the nearest town or population centre?

2.2.3 - For wetlands on national boundaries only

a) Does the wetland extend onto the territory of one or more other countries? Yes  No

b) Is the site adjacent to another designated Ramsar Site on the territory of another Contracting Party? Yes  No

c) Is the site part of a formal transboundary designation with another Contracting Party? Yes  No

d) Transboundary Ramsar Site name:

2.2.4 - Area of the Site

*If you have not established an official area by other means, you can copy the area calculated from the GIS boundaries into the 'official area' box.*

Official area, in hectares (ha):

Area, in hectares (ha) as calculated from GIS boundaries

2.2.5 - Biogeography

*Please provide the biogeographic region(s) encompassing the site and the biogeographic regionalization scheme applied:*

Biogeographic regions

Regionalisation scheme(s)	Biogeographic region
EU biogeographic regionalization	Mediterranean

Other biogeographic regionalisation scheme

### 3 - Why is the Site important?

#### 3.1 - Ramsar Criteria and their justification

*Tick the box against each criterion applied to the designation of the Ramsar Site. All criteria which apply should be ticked. Please explain why you selected a criterion by filling in the relevant fields on this page, on the three other pages of this section 'Criteria & justification' and on the 'Wetland types' page of the section 'What is the site like?'. More guidance on how to justify a criterion will appear when you tick it as well as in the help box.*

**Criterion 1: Representative, rare or unique natural or near-natural wetland types**

To justify this Criterion, please select at least one wetland type as representative, rare or unique in the section 'What is the site like?' > 'Wetland types' and provide further details in at least one of the three boxes below.

Hydrological services provided  
*(This field is limited to 3000 characters)*

Storage and delivery of water

Other ecosystem services provided  
*(This field is limited to 3000 characters)*

Supports a variety of all life forms including plants, animals and microorganisms. Nature observation and nature-based tourism. Important knowledge systems, importance for research (scientific reference area or site) and long-term monitoring site.

Other reasons  
*(This field is limited to 3000 characters)*

The site represents one of the last remnants of a complex of wetlands (partly salty and partly freshwater) and sandy dunes, which constituted the pristine landscape of the Tyrrhenian coast, presently largely disappeared because of reclamation actions by man. This site still has a very important ecological role, because of the presence of relevant and diverse habitats, including rare plant species (e.g. *Halocnemum strobilaceum*). Furthermore, the site has a great importance for birds and, especially, for waterbirds, including a number of species listed in the EU Birds Directive, as well as with a great conservational relevance on national/international level.

**Criterion 2 : Rare species and threatened ecological communities**

Justification, see: - relevant plant species in the section 'Criteria & justification' > 'Plant species (3.2)' - relevant animal species in the section 'Criteria & justification' > 'Animal species (3.3)' - relevant ecological communities in the section 'Criteria & justification' > 'Ecological communities (3.4)'

**Criterion 3 : Biological diversity**

Justification, see: - relevant plant species in the section 'Criteria & justification' > 'Plant species (3.2)' - relevant animal species in the section 'Criteria & justification' > 'Animal species (3.3)'

Justification  
*(This field is limited to 3000 characters)*

The site is very important for maintaining the biological diversity of coastal wetlands in the Tyrrhenian coastal area, especially concerning birds. In fact, more than 150 species of birds are listed as present or migrate to the area and many of them have a great conservational relevance (see Section 3.3). Furthermore, the site includes a variety of different habitats (see Section 3.4).

**Criterion 4 : Support during critical life cycle stage or in adverse conditions**

Justification, see: - relevant plant species in the section 'Criteria & justification' > 'Plant species (3.2)' - relevant animal species in the section 'Criteria & justification' > 'Animal species (3.3)' and explain the life cycle stage or nature of adverse conditions in the accompanying 'justification' box.

**Criterion 5 : >20,000 waterbirds**

Justification, see: the total number of waterbirds and the period of data collection - relevant waterbird species, and if possible their population size, in the section 'Criteria & justification' > 'Animal species (3.3)'

Overall waterbird numbers

End year

Source of data:

Criterion 6 : >1% waterbird population

Justification, see: Criteria & justification > Animal species (3.3)

Criterion 7 : Significant and representative fish

Justification, see: Criteria & justification > Animal species (3.3)

Justification

(This field is limited to 3000 characters)

Criterion 8 : Fish spawning grounds, etc.

To justify this Criterion, please give information in the box below. Completion of details on relevant fish species in the section Criteria & justification > Animal species (3.3) is optional.

Justification

(This field is limited to 3000 characters)

Criterion 9 : >1% non-avian animal population

To justify this Criterion, please give details on relevant non-avian species and their population size in the section Criteria & justification > Animal species (3.3)

### 3.2 - Plant species whose presence relates to the international importance of the site

### 3.4 - Ecological communities whose presence relates to the international importance of the site

Name of ecological community	Community qualifies under Criterion 2?	Description	Justification
Mediterranean and thermo-Atlantic halophilous scrubs ( <i>Sarcocornetea fruticosi</i> )	<input checked="" type="checkbox"/>	Perennial vegetation of marine saline muds (schorre) mainly composed of scrub (genera <i>Sarcocornia</i> and <i>Arthrocnemum</i> ).	Listed in the EU Habitats Directive, Annex 1 (Natura 2000 code: 1420)
Mediterranean salt meadows ( <i>Juncetalia maritimi</i> )	<input checked="" type="checkbox"/>	Coastal/sub-coastal communities generally dominated by <i>Juncus</i> spp. or other species ( <i>Juncetalia maritimi</i> ).	Listed in the EU Habitats Directive, Annex 1 (Natura 2000 code: 1410)
<i>Salicornia</i> and other annuals colonizing mud and sand	<input checked="" type="checkbox"/>	Formations composed mostly or predominantly of annuals, in particular <i>Chenopodiaceae</i> of the genus <i>Salicornia</i> or grasses, colonising periodically inundated muds and sands of marine or interior salt marshes.	Listed in the EU Habitats Directive, Annex 1 (Natura 2000 code: 1310)
Annual vegetation of drift lines	<input checked="" type="checkbox"/>	Formations of annuals or representatives of annuals and perennials, occupying accumulations of drift material and gravel rich in nitrogenous organic matter	Listed in the EU Habitats Directive, Annex 1 (Natura 2000 code: 1210)
Mediterranean tall humid grasslands of the <i>Molinio-Holoschoenion</i>	<input checked="" type="checkbox"/>	Mediterranean humid grasslands of tall grasses and rushes	Listed in the EU Habitats Directive, Annex 1 (Natura 2000 code: 6420)
<i>Cisto-Lavenduletalia</i> dune sclerophyllous scrubs	<input checked="" type="checkbox"/>	Sclerophyllous scrubs established on dunes.	Listed in the EU Habitats Directive, Annex 1 (Natura 2000 code: 2260)
Coastal dunes with <i>Juniperus</i> spp	<input checked="" type="checkbox"/>	Heterogeneous formations of coastal dune slacks and slopes, dominated by <i>Juniperus</i> spp.	Listed in the EU Habitats Directive, Annex 1 (Natura 2000 code: 2250). Priority habitat.
<i>Brachypodietalia</i> dune grasslands with annuals	<input checked="" type="checkbox"/>	Pseudo-steppe with grasses and annuals.	Listed in the EU Habitats Directive, Annex 1 (Natura 2000 code: 2240)
<i>Malcolmietalia</i> dune grasslands	<input checked="" type="checkbox"/>	Associations with many small annuals and often abundant ephemeral spring bloom, of deep sands in dry interdunal depressions of the coasts.	Listed in the EU Habitats Directive, Annex 1 (Natura 2000 code: 2230)
Shifting dunes along the shoreline with <i>Ammophila arenaria</i> ('white dunes')	<input checked="" type="checkbox"/>	Mobile dunes forming the seaward cordon or cordons of dune systems of the coast, including mainly <i>Ammophila arenaria</i> subsp. <i>australis</i> .	Listed in the EU Habitats Directive, Annex 1 (Natura 2000 code: 2120)
Coastal lagoons	<input checked="" type="checkbox"/>	Expanses of shallow coastal salt water, of varying salinity and water volume.	Listed in the EU Habitats Directive Annex 1 (Natura 2000 code: 1150). Priority habitat.
Embryonic shifting dunes	<input checked="" type="checkbox"/>	Formations of the coast representing the first stages of dune construction. The main species is <i>Agropyron junceum</i> .	Listed in the EU Habitats Directive, Annex 1 (Natura 2000 code: 2110)
Wooded dunes with <i>Pinus pinea</i> and/or <i>Pinus pinaster</i>	<input checked="" type="checkbox"/>	Coastal dunes colonised by pines	Listed in the EU Habitats Directive, Annex 1 (Natura 2000 code: 2270). Priority habitat.

## 4 - What is the Site like? (Ecological character description)

### 4.1 - Ecological character

Please summarize the ecological components, processes and services which are critical to determining the ecological character of the site. Please also summarize any natural variability in the ecological character of the site, and any known past or current change

(This field is limited to 4000 characters)

The site lies on one of the last remnants of coastal wetlands in Italy, showing a great value from ecological and conservation points of view. The landscape includes near-natural, permanent/seasonal floodplains, which underwent natural (e.g. coastline) and man-induced (e.g. reclaims) changes, throughout centuries. The area holds a mosaic of different habitats, being dominated by reed (*Juncus maritimus* and *Juncus acutus*), halophilous scrubs (mainly *Arthrocnemum glaucum* and *Arthrocnemum perenne*), pinewood (*Pinus pinea* and *Pinus pinaster*), as well as juniper *Juniperus* spp. and sclerophyllic vegetation on sandy dunes. The site is an important wintering area for birds and is especially important for waterbirds. The site lies in the most important wintering site of *Anser anser*, in Tuscany and holds a number of bird species protected under international, national and/or regional legislation.

### 4.2 - What wetland type(s) are in the site?

Please list all wetland types which occur on the site, and for each of them:

- rank the four most abundant types by area from 1 (greatest extent) to 4 (least extent) in the third column,
- if the information exists, provide the area (in ha) in the fourth column
- if this wetland type is used for justifying the application of Criterion 1, indicate if it is representative, rare or unique in the last column
- you can give the local name of the wetland type if different from the Ramsar classification system in the second column

#### Marine or coastal wetlands

Wetland types (code and name)	Local name	Ranking of extent (1: greatest - 4: least)	Area (ha) of wetland type	Justification of Criterion 1
E: Sand, shingle or pebble shores		4		Rare
F: Estuarine waters		3		Rare
G: Intertidal mud, sand or salt flats		1		Rare
H: Intertidal marshes		2		Rare
J: Coastal brackish / saline lagoons		4		Rare

#### Inland wetlands

Wetland types (code and name)	Local name	Ranking of extent (1: greatest - 4: least)	Area (ha) of wetland type	Justification of Criterion 1
Fresh water > Flowing water >> Mt Permanent rivers/ streams/ creeks		4		Rare

#### 4.4 - Physical components

##### 4.4.1 - Climate

Please indicate the prevailing climate type(s) by selecting below the climatic region(s) and subregion(s), using the Köppen-Gieger Climate Classification System.

Climatic region	Subregion
C: Moist Mid-Latitude climate with mild winters	Csb: Mediterranean (Mid with dry, warm summer)

If changing climatic conditions are affecting the site, please indicate the nature of these changes:

(This field is limited to 1000 characters)

##### 4.4.2 - Geomorphic setting

a) Minimum elevation above sea level (in metres)

a) Maximum elevation above sea level (in metres)

b) Position in landscape/river basin:

- Entire river basin
- Upper part of river basin
- Middle part of river basin
- Lower part of river basin
- More than one river basin
- Not in river basin
- Coastal

Please name the river basin or basins. If the site lies in a sub-basin, please also name the larger river basin. For a coastal/marine site, please name the sea or ocean.

(This field is limited to 1000 characters)

The site is around the mouth of the Ombrone river, which enters in the Mediterranean (Thyrrean) Sea.

##### 4.4.3 - Soil

- Mineral
- Organic
- No available information

Are soil types subject to change as a result of changing hydrological conditions (e.g., increased salinity or acidification)? Yes  No

Please provide further information on the soil (optional)

(This field is limited to 1000 characters)

##### 4.4.4 - Water regime

Water permanence

Presence?
Usually permanent water present
Usually seasonal, ephemeral or intermittent water present

Source of water that maintains character of the site

Presence?	Predominant water source
Water inputs from rainfall	<input type="checkbox"/>
Water inputs from surface water	<input type="checkbox"/>
Marine water	<input type="checkbox"/>

Water destination

Presence?
Marine
Feeds groundwater

Stability of water regime

<b>Presence?</b>
Water levels largely stable
Water levels fluctuating (including tidal)

Please add any comments on the water regime and its determinants (if relevant). Use this box to explain sites with complex hydrology.

4.4.6 - Water pH

Acid (pH<5.5)

Circumneutral (pH: 5.5-7.4 )

Alkaline (pH>7.4)

Unknown

Please provide further information on pH (optional):

*(This field is limited to 1000 characters)*

4.4.7 - Water salinity

Fresh (<0.5 g/l)

Mxohaline (brackish)/Mxosaline (0.5-30 g/l)

Euhaline/Eusaline (30-40 g/l)

Hyperhaline/Hypersaline (>40 g/l)

Unknown

Please provide further information on salinity (optional):

*(This field is limited to 1000 characters)*

In the site, water salinity is largely variable across wetlands (where salinity is higher) and the mouth of the Ombrone river where, usually, salinity is lower. Furthermore, salinity varies also in relation to climate seasonality, with particular reference to rainfall.

4.4.9 - Features of the surrounding area which may affect the Site

Please describe whether, and if so how, the landscape and ecological characteristics in the area surrounding the Ramsar Site differ from the i) broadly similar  ii) significantly different  site itself.

If the surrounding area differs from the Ramsar Site, please indicate how. (Please tick all categories that apply)

- Surrounding area has greater urbanisation or development
- Surrounding area has higher human population density
- Surrounding area has more intensive agricultural use
- Surrounding area has significantly different land cover or habitat types

Please describe other ways in which the surrounding area is different:  
(This field is limited to 2000 characters)

In the surrounding area non intensive agriculture occurs.

4.5 - Ecosystem services

4.5.1 - Ecosystem services/benefits

Please select below all relevant ecosystem services/benefits currently provided by the site and indicate their relative importance in the right-hand column.

Provisioning Services

Ecosystem service	Examples	Importance/Extent/Significance
<no data available>		

Regulating Services

Ecosystem service	Examples	Importance/Extent/Significance
Maintenance of hydrological regimes	Storage and delivery of water as part of water supply systems for agriculture and industry	Low

Cultural Services

Ecosystem service	Examples	Importance/Extent/Significance
Recreation and tourism	Nature observation and nature-based tourism	High
Scientific and educational	Important knowledge systems, importance for research (scientific reference area or site)	High

Supporting Services

Ecosystem service	Examples	Importance/Extent/Significance
Biodiversity	Supports a variety of all life forms including plants, animals and microorganisms, the genes they contain, and the ecosystems of which they form a part	High

Other ecosystem service(s) not included above:

(This field is limited to 2000 characters)

Please make a rough estimate of the approximate number of people who directly benefit from the ecological services provided by this site (estimate at least in orders of magnitude: 10s, 100s, 1000s, 10 000s etc.):

Within the site:

Outside the site:

Have studies or assessments been made of the economic valuation of ecosystem services provided by this Ramsar Site? Yes  No  Unknown

Where economic studies or assessments of economic valuation have been undertaken at the site, it would be helpful to provide information on where the results of such studies may be located (e.g. website links, citation of published literature):

4.5.2 - Social and cultural values

Is the site considered internationally important for holding, in addition to relevant ecological values, examples of significant cultural values, whether material or non-material, linked to its origin, conservation and/or ecological functioning? If so, please describe this importance under one or more of the four following categories. You should not list here any values derived from non-sustainable exploitation or which result in detrimental ecological changes.

i) the site provides a model of wetland wise use, demonstrating the application of traditional knowledge and methods of management and use that maintain the ecological character of the wetland

Description if applicable

(This field is limited to 2500 characters)

ii) the site has exceptional cultural traditions or records of former civilizations that have influenced the ecological character of the wetland

Description if applicable

(This field is limited to 2500 characters)

iii) the ecological character of the wetland depends on its interaction with local communities or indigenous peoples

Description if applicable

(This field is limited to 2500 characters)

iv) relevant non-material values such as sacred sites are present and their existence is strongly linked with the maintenance of the ecological character of the wetland

Description if applicable

Please describe any other threats (optional):

(This field is limited to 3000 characters)

Coastal erosion has determined a retreat of the coastline. Surveys of ground water have documented the presence of a salt-wedge. In turn, a high impact has been determined on habitats because of the introgression of salt, sea water, both direct and through canals. Since 2011, in the neighbourhoods of the area, specific actions have been conducted to mitigate coastal erosion (supported by the Tuscany Region Agency).

### 5.2.2 - Legal conservation status

Please list any other relevant conservation status, at global, regional or national level and specify the boundary relationships with the Ramsar Site:
